

Ilyas Nugmanov

Flutter Developer | Mobile Engineer

Astana, Kazakhstan | +7 (702) 774-35-71 | nugmanovilyas228@gmail.com | github.com/m1roxx | linkedin.com/in/aneru | t.me/m1roxx

PROFESSIONAL SUMMARY

Flutter Developer with 2+ years of commercial experience building production mobile, web, and kiosk applications with Flutter and Dart. Delivered B2B and HoReCa products used across 100+ restaurants, including apps built from scratch, white-label solutions, offline/online synchronization, payment and POS integrations, and production releases. Strong in Clean Architecture, BLoC/Riverpod, REST/WebSocket, Firebase, CI/CD, automated testing, and end-to-end ownership from architecture and API integration to iOS/Android delivery and production support.

CORE SKILLS

Flutter & Architecture: Flutter, Dart, Flutter Web, BLoC, Riverpod, Clean Architecture, feature-first, SOLID, repository pattern, GetIt/Injectable

Networking & Data: REST APIs, WebSocket, Dio, Retrofit, Freezed/json_serializable, Drift, PostgreSQL, MongoDB

Firebase & Platform: Firebase Auth, Firestore, FCM, deep links, geolocation/permissions, iOS, Android, iPad/kiosk

Testing & Delivery: unit, widget and integration testing, Git, GitHub Actions, CI/CD, TestFlight, Xcode, Android Studio, FVM, Docker

Integrations: iiko, Poster, Kaspi QR/POS, JetPay, Uzcard/Humo, POS terminals, Amplitude

Additional: AutoRoute, GoRouter, Swift, JavaScript, Bash, App Store/TestFlight release workflows

PROFESSIONAL EXPERIENCE

Flutter Developer - Qi Tech Ltd

Jul 2025 - Present | Products: Ailillu QR Menu, Ailillu Kiosk

- Built Ailillu Kiosk from scratch and developed major production features across Ailillu QR Menu, covering architecture, UI, API integrations, payments, releases, and production support.
- Developed and maintained Flutter mobile, Flutter Web, and iPad kiosk experiences used across 100+ restaurants and real customer ordering flows.
- Designed and maintained a white-label architecture with a shared core repository and restaurant-specific applications for branding, content, delivery flows, and release customization.
- Integrated iiko, Poster, Kaspi QR/POS, JetPay, Uzcard/Humo, and POS terminals; handled complex order, payment, availability, retry, and synchronization states.
- Implemented offline/online synchronization and safeguards against duplicate operation processing in transactional flows; used Drift for local payment and return history.
- Implemented WebSocket-based AI chat and real-time communication flows with production-oriented error handling and recovery.
- Adapted UI and platform behavior across iOS, Android, web, and iPad form factors, including deep links, permissions, and geolocation-dependent flows.
- Added Amplitude analytics, caching and performance improvements, and wrote unit, widget, and integration tests for critical business flows.
- Maintained GitHub Actions CI/CD and iOS release workflows with TestFlight, and investigated production incidents across app, backend, payment, and restaurant-system boundaries.

Flutter Developer - dBridge LLP

Sep 2024 - Jul 2025 | Product: Enki - B2B construction management platform

- Developed and maintained production mobile and Flutter Web applications for a B2B construction platform.
- Delivered scalable feature modules using Clean Architecture, feature-first structure, BLoC, AutoRoute, Dio/Retrofit, Freezed, and dependency injection.
- Integrated REST APIs, role-based access control (RBAC), Firebase push notifications, and complex business workflows.
- Participated in code reviews and architecture discussions, improving maintainability, error handling, and consistency across the codebase.
- Optimized performance and production behavior for enterprise-grade UI and data-heavy features.

EDUCATION

Astana IT University, Kazakhstan | B.Sc. in Software Engineering | 2023 - 2026

LANGUAGES

Russian - fluent | English - B2 (working proficiency)
